

Jose Ignacio Alutiz is Process Digital Systems Engineering Manager and Digitalization Coordinator at ANAV (Asociación Nuclear Ascó Vandellós II) which operates three nuclear reactors in Tarragona (Spain): Ascó 1, Ascó 2 & Vandellós II. He joined ANAV in 2017 and has 20 years of experience in the nuclear industry.

Jose Ignacio leads a team with the focus in the development of digital initiatives across ANAV, taking account of the potential of new technologies for processes improvements and employee satisfaction, in order to keep their Nuclear Power plants technologically updated, reliable, competitive and safe for long-term operation.

Prior to this current role, Jose Ignacio developed his career in engineering and maintenance leading positions, managing electrical and I&C reliability and obsolescence issues replacing original analog technologies with digital automation systems. He has participated in several technical support missions for INPO (The Institute of Nuclear Power Operations) and WANO (The World Association of Nuclear Operators) as well.

Jose Ignacio is Electrical & Control Engineer from Cantabria University, he completed a General Management Program from Deusto Business School and is part of AED (Spanish Association of Executives) board in Tarragona where ANAV has its headquarters.
